☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

- ☐ the entire international application,
☒ claims Nos. 1-38 with respect to industrial applicability

because:

- ☒ the said international application, or the said claims Nos. 1-38 with respect to industrial applicability relate to the following subject matter which does not require an international preliminary examination (specify):

see separate sheet

- ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
☐ no international search report has been established for the said claims Nos.

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

- ☐ the written form has not been furnished or does not comply with the Standard.
☐ the computer readable form has not been furnished or does not comply with the Standard.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 1-38 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The following documents are referred to in this communication; the numbering will be adhered to in the rest of the procedure:

D1: Proceedings Of The American Association For Cancer Research
Annual, 2000, 41: 612.

- 1.1 Unless indicated, reference is made to the passages indicated in the international search report.

2. **Novelty (Art. 33(2) PCT)**

D1 discloses the use of anhydrovinblastine (AHVB) in patients with advanced malignancies. Concretely, AHVB is used therein in patients with the following tumour types: squamous cell carcinoma of the lung, adenocarcinoma of the colon, adenocarcinoma of the breast and soft tissue sarcoma. The doses used are 2.5, 5, 10 and 16.5 mg/m².

Consequently, the subject-matter of present claims 1-79 does not fulfil the requirements set forth under Art. 33(2) PCT.

3. **Inventive Step (Art. 33(3) PCT)**

Claims 1-79 are not novel and they are therefore not inventive.

4. **Industrial applicability (Art. 33(4) PCT)**

EXAMINATION REPORT - SEPARATE SHEET

- 4.1 For the assessment of the present claims 1-38 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
- 4.2 Present claims 39-79 are susceptible of industrial application and thus do not contravene Art. 33(4) PCT.
